

Be Ready with Meisterplan

Meisterplan is a cloud-based software that helps business leaders make sound business decisions and reliably deliver the best outcomes. With its strategic alignment features along with its visual roadmap, Meisterplan makes it easy to prioritize and optimize the work you can get done with your current teams and resources. Real-time scenario planning allows you to determine how many additional resources you need to complete new projects and what the impact will be across your organization.

Project Portfolio Management

Build portfolios with the right people working on the highest priority projects at the best possible time.

- Manage your project pipeline and stage gate processes from initiatives through to completed projects
- Assess whether a project realistically fits into your portfolio
- Get quick answers to what-if questions through scenario planning
- See the impact of changes on all projects, resources and finances
- Ensure your organization works on what is most important to your business

Capacity Planning

Know which people with what skills are available when to maximize resource utilization.

- Get an accurate overview of employee skills, availability and capacity
- Allocate staff by role, by skill or by individual to determine if you have the capacity to deliver
- See when employees are overbooked and resolve those over-allocations before they even occur
- Simulate scheduling and project portfolio alternatives to optimize resource utilization
- Immediately see the impact of adding or removing internal or external resources
